

# Infections

Infections begin when germs enter the body and cause harm. Cancer and certain treatments can increase your risk of getting an infection, but you can protect yourself.

## TRY THIS

**Wash your hands.** Keep your hands clean, especially before eating.

**Take care of cuts, scrapes, and surgery wounds.** Clean broken skin and protect it with a bandage.

**Avoid germs.** Stay away from people who are sick or have a cold. Avoid crowds. Make sure your food is clean and thoroughly cooked.
