

Health Care Team

Cancer treatment typically requires a team of health care professionals, including doctors, nurses, and other staff who help take care of you before, during, and after treatment.

TRY THIS

Establish good communication. Take notes and bring someone with you to appointments.

Build a relationship. Let your health care team know what you expect from them.

Be prepared. Write down questions ahead of appointments.

Consider a second opinion. Ask your doctor for a referral and to share your medical records.
