## **Skin and Nail Changes**

Cancer treatments may cause a range of skin and nail changes, including color changes, redness, itching, dryness, and rashes. You can take care of most of these yourself.

## **TRY THIS**

Try gentle products. Use mild soaps, lotions, and creams.

**Protect your skin from the sun.** Wear loose-fitting clothing and a hat when outdoors. Check with your health care team if it's okay to use sunscreen.

Avoid hot water. Shower in lukewarm water and avoid baths.

**Wear gloves.** Cover your hands when you wash the dishes, clean the house, or work in the garden.
